

# 2023-2024 INFUSION Products & Services Guide

# About the Products & Services Guide

The companies featured here are long-time supporters of the home and alternate site infusion therapy community. They bring to market the solutions providers need to succeed. Their innovations propel us and enable advances in the quality of patient care as well as increases in efficiencies and cost savings.

This guide was assembled as a resource for busy clinicians, managers, reimbursement professionals, and sales and marketing experts. By making it "evergreen," we hope to offer a quick and easy means of finding equipment, supplies, and other products and services that meet the unique demands of home and alternate site infusion care.

Special thanks to those companies in the supplier community that support the NHIA's activities all year long. Your partnership helps to advance provider practice as well as the industry.

## Company Background & Services Overview

Over the course of three decades, ACU-Serve has solidified its position as a trusted strategic business partner for HME and Home Infusion providers across the United States, with a comprehensive range of services, including intake, documentation retrieval, AR follow-up and collections, resupply management, and consulting.

ACU-Serve has a foundation of more than 220 dedicated US-based employees, combined with a network of over 400 outsourced partners. This synergy allows us to deliver an exceedingly cost-effective full-service solution tailored to meet your unique needs.

ACU-Serve initially entered the Home Infusion sector due to requests from several hospital systems they were working with. **These hospital systems, impressed by the positive outcomes achieved in AR follow-up and collections for the HME/DME lines of business, expressed their desire for ACU-Serve to extend their services to the Home Infusion domain.**

We're honored to talk with partners like Beth Roberts, Manager of Revenue Integrity for Home Infusion, Pharmacy, and Home Medical Equipment at OSF Healthcare, about outsourcing RCM and the role ACU-Serve has played in streamlining their processes.

When asked about her recommendations to other healthcare organizations considering RCM outsourcing, Beth's response was emphatic: "To me, it's a no-brainer...ACU-Serve collects every penny that we're owed, and they work hard at it—like it's their own money. Aside from that, the employees that we work with at ACU-Serve, and maybe this is even the best thing about them, are so professional. If I ask them to do something, even if it's outside of the scope of our contract, they are willing to help, they are willing to answer questions."

David Franklin, Board Chair of the National Home Infusion Foundation and recognized authority in the home infusion industry, shares his insights on the importance of outsourcing and the transformative results achieved with quantified data and actionable items identified by partners like ACU-Serve. "If you're not measuring it, you're not managing it," asserts David.

"To me, using ACU-Serve is a no-brainer. ACU-Serve collects every penny that we're owed, and they work hard at it—like it's their own money. Aside from that, the employees that we work with at ACU-Serve, and maybe this is even the best thing about them, are so professional."

- Beth Roberts

When asked about the importance of data, David explained that without analysis and understanding, data becomes distracting, "Ensuring that the data is accurate and reliable lays the groundwork for making informed decisions that drive positive outcomes." ACU-Serve's sophisticated workflow system leverages AI to minimize claim touches and enhance data quality, streamlining revenue cycle management.

For Beth and OSF, the data and comprehensive insight that ACU-Serve's proprietary technology, Clarity, provides is a powerful resource. Beth states, "Clarity gives you a global view of where your money is sitting, what's new in the last 30 days, what's over 90, all the way down to a particular insurance level. It can also drill down to a particular patient, status or invoice. Anything you would ever want to know, high level down to the minutia, it's got it."

To experience the same unparalleled service and transformative power of ACU-Serve, call us or visit [ACUServeCorp.com](http://ACUServeCorp.com).

# Takes one to know one

“Being a home infusion pharmacist, I get what you’re up against. I’ve been in the same position and experienced those same headaches. That’s why I love helping other pharmacists and techs go from zero to 100 — with automated software that brings the awesome patient outcomes we’re all in this for.”

## Company Background

Brightree's infusion pharmacy software solution is built on the industry's most trusted billing and business management platform – and backed by a team of seasoned industry experts – to automate and streamline every step of your daily workflow.

As a result, you have everything you need for intake, dispensing, billing, patient management and more – all within a single-cloud based solution that includes tailored implementations and real-time support. That means your infusion pharmacy can save time, eliminate errors and accelerate care delivery to boost patient care and profitability.

## Product & Services Overview

By investing in the latest technology innovations that eliminate manual processes, Brightree makes it easier and more efficient for home infusion pharmacies to clinically monitor patients, scan and automatically file essential documents and improve your power to communicate with prescribers. Features like digital prescriptions allow you to efficiently receive, fill and renew prescriptions, all while reducing errors and improving patient safety. And new features within workflows for intake, pharmacy, warehouse, nursing and revenue bring even greater efficiencies to your home infusion pharmacy business.

Over 100 million patients and caretakers have been served through Brightree technology, and the company remains committed to enhancing the patient-centric experience and improving health outcomes across the care continuum, while improving the agility and business performance for home infusion pharmacy providers.

### Bigger benefits

- **Automated workflows.** End-to-end infusion pharmacy workflows with seamless transitions of care between team members that optimizes the patient experience.
- **Intake acceleration.** Reduce your intake time and speed up the time to get the patient on the right care plan.
- **Predictable revenue.** With minimal intervention to your

## Pharmacies improve care

"The mark of an excellent pharmacy software platform is how it makes it easier for users to do their jobs. Brightree pharmacy platform makes it much easier to take care of our home infusion patients."

– Bryce Jackman, director of pharmacy, CarePro Home Health & Home Infusion Pharmacy

revenue cycle, staff can bill accurately and work more efficiently to maximize your revenue.

- **High interoperability:** Integrations digitally connect your pharmacy to stakeholders across the care continuum for high efficiency.
- **Measurable outcomes.** Efficiently record adverse patient events for multiple purposes (SHP, NHIA) in one place for measurable outcomes for your home infusion pharmacy.

### Faster cash flow

Brightree also understands what you're up against when it comes to payment disruptions and chasing collections. That's why they offer Brightree Revenue Cycle Management services to help you optimize your billing systems and reduce turnaround time so you can get your money faster. In fact, providers using the service average a 15% increase in net revenue collection ratio so they can focus on patient care and growing the business.

### Experts who've been there

With real-world expertise working in the many roles within the infusion pharmacy care setting, Brightree's team of seasoned industry experts deliver superior service and support and an enhanced user experience, creating workflows that work the way your pharmacy business does to help facilitate long-term success.

# In real time: Scheduling

---

With CitusHealth, organizations get more than a communication tool. They get a fully integrated collaboration platform with robust patient support that enables seamless communication, captures electronic signatures, customizes forms, and so much more.

"We found during our evaluation that the CitusHealth platform was the only solution available in the market that allowed us to not only digitally engage with the patient, but also improve our workflow across our entire team, including our pharmacists, clinicians and delivery staff as well physicians," - *Karie Terada, Assistant Director of Pharmacy Operations, Pharmacare Hawaii*

## Company Background

Founded in 2016 by an internationally recognized digital health expert, Melissa Kozak, RN, BSN, CitusHealth delivers the only comprehensive on-demand digital and mobile platform that sets a new standard of patient, caregiver, family, and partner engagement.

## Product & Services Overview

The CitusHealth platform is a complete end-to-end solution specifically designed to help infusion providers and pharmacies accelerate speed to therapy – ultimately resulting in better outcomes and increased revenue.

### A comprehensive system of engagement

As experienced clinicians and operations leaders from the home infusion industry, we understand the challenges providers face when it comes to collecting data from patients to dispense their medication. Now more than ever, it's critical to provide real-time communication for patients, caregivers, and care teams to enable a higher level of collaboration. CitusHealth offers a completely integrated platform with digital, mobile, and app-less features.

### Must-have solutions for infusion providers

- **Schedule coordination and real-time nursing notes:** Expand productivity of clinical resources through secure, real-time messaging, schedule coordination, patient plan of care updates, and streamlined nursing notes and documentation.
- **Automated supply management:** Reduce supply waste, emergency supply deliveries, and other inefficiencies by capturing accurate supply counts remotely or at the point of care.
- **Secure, real-time patient communication:** Enable real-time patient and caregiver communication with clinicians

and staff through secure messaging, specifically designed to be HIPAA compliant.

- **Customizable digital forms and workflows:** Accelerate billing timelines, increase cash flow, and improve compliance with streamlined referral and ordering processes, as well as more timely and accurate documentation.

### We're setting a new standard for patient care

- **On-demand resources:** Empower patients and caregivers with educational materials designed for their plan of care to support therapy adherence – available at any time, from nearly any device.
- **Secure video sessions:** Provide staff with secure video chat to troubleshoot patient concerns, injection training, side effect triaging, and learn of additional care required.
- **Digital signature capture:** Obtain signed documents with our mobile app, app-less link, or in person to expedite dispensing and reimbursement.
- **Multi-lingual patient and family communication:** Automatically translate messages to multiple languages to minimize communication barriers and reduce delays in care.

## Company Background

Fresenius Kabi Nutrition is a pioneer and global leader in clinical nutrition with innovations that nourish at every age and stage of life. Our parenteral nutrition (PN) products are used to help care for critically ill and chronically ill patients in hospitals, long-term care facilities, and at home.

With a tireless dedication to driving advancements in lifesaving medicines and technologies, we've introduced many firsts in the field, including the use of fish oil in PN products because we know that lipid source matters when considering appropriate nutrition for patients. We're committed to supporting marine conservation by ensuring that the fish oil in our products is sustainably sourced.

We're proud to not only fulfill the need for alternative lipid emulsions, but also to facilitate peer-to-peer interactions, industry partnerships, patient education, and social communities. We're also dedicated to helping patients get access to innovative PN products. We created the KabiCare Patient Support Program for Nutrition, an online resource, to guide healthcare providers through the challenges of PN reimbursement and simplify the treatment journey for their patients on PN.

## Product & Services Overview

**SMOFlipid®** (Lipid Injectable Emulsion, USP 20%): the first and only 4-oil lipid injectable emulsion (ILE) for patients of all ages.

**Omegaven®** (fish oil triglycerides) injectable emulsion: the first and only 100% fish oil ILE for pediatric patients with parenteral nutrition-associated cholestasis (PNAC).

**INTRALIPID®** (lipid injectable emulsion, USP 20%): a 100% soybean oil lipid emulsion that is well documented in medical literature and has been provided worldwide in more than 200 million infusions for adult and pediatric patients.

**Kabiven® / Perikabiven®** (Amino Acids, Electrolytes, Dextrose, and Lipid Injectable Emulsion), for intravenous use: the first and only three-chamber bag for PN to deliver three macronutrients

As pioneers in clinical nutrition, our innovations nourish at every age and stage of life—from hospital to home. We are proud to have developed the first and only 4-oil ILE, the first and only 100% fish oil ILE, and the first and only 3-chamber bag for parenteral nutrition.

(dextrose, protein, and lipids) plus electrolytes in volumes and concentrations that meet the needs of adult PN patients.

**Please see important safety information and full prescribing information for all products at:**  
[FreseniusKabiNutrition.com/pn-portfolio/](https://www.freseniuskabinutrition.com/pn-portfolio/).

Our purpose is *caring for life* — putting lifesaving medicines and technologies in the hands of people who care for patients and finding solutions to the challenges they face. We work shoulder-to-shoulder with healthcare professionals to help improve medication safety, design products that are easy to use, and help make medicines more accessible and affordable across the continuum of care. **See how we can help your critically and chronically ill patients flourish with our portfolio of clinical nutrition products at**

## Integrated Medical Systems, Inc. (IMS)

### Company Background

IMS is a leading and experienced national distributor exclusively focused on the alternate site market since 1994. As a dedicated provider in this specialized space, we play a crucial role in ensuring seamless and uninterrupted patient care. Our commitment to exceeding expectations and putting our customers first makes us the most trusted partner in the alternate site market.

We offer a comprehensive range of flexible rental and purchase options for infusion and respiratory equipment. Additionally, our extensive line of disposable products caters specifically to infusion, respiratory, enteral feeding, and cleanroom needs. With IMS by your side, you have access to high-quality equipment and essential disposable items, enabling you to deliver exceptional care to your patients.

### Product & Services Overview

**Disposables** - Offering a broad line of high-quality medical disposables, including our private label, IMed Products, at competitive prices.

**Equipment Rentals** - Rental, lease, & sales options of infusion, respiratory, and enteral devices that fit your treatment protocols, staff, and budget.

**Service & Repair** - ISO-certified biomedical services that are a cost-effective, quality alternative for your equipment upkeep and repair.

**Asset Tracking** - Our real-time tracking system allows you to monitor the usage, status, and location of your mobile assets effectively and efficiently.

IMS is a trusted and experienced partner in the alternate site market, leading with innovative solutions for improved patient care and provider efficiency. With a focus on patients and providers, we've got you covered.

# How does your infusion pump actually deliver medication?

Smaller micro-boluses help reduce the spiking and troughing of medication blood serum levels and provide a more constant therapeutic effect.

## CURLIN® 6000

Optimizes medication transport by minimizing the size of each bolus and reducing the time between each bolus delivery - providing a consistent, steady infusion.

## Moog Medical

### Company Background

For over 20 years, Moog Medical has designed proven, reliable, portable, and easy-to-use infusion pumps and enteral feeding pumps that allow our patients to live life more fully.

### Product & Services Overview

CURLIN infusion pumps are uniquely designed to deliver precise, efficient, and flexible infusions in a compact size. CURLIN Pumps feature a unique curvilinear design, which results in best-in-class flow continuity with precise and steady fluid delivery throughout the entire infusion duration.

Infinity enteral feeding pumps are the only 100% mobile enteral feeding pumps, providing patients of all ages the ability to live life more fully. Powerful enough to use in the ICU, and rugged enough for patients to use on the go, Infinity pumps deliver personalized nutrition anytime, anywhere.

Our industry-leading clinical and customer support teams are available to assist customers and patients with any question or concern 24 hours a day, 7 days per week, any day of the year.

## Prudential Cleanroom Services

### Company Background

Since 1960, Prudential Cleanroom Services (PCS) has provided cleanroom apparel services and has developed into an internationally recognized source for bioscience, USP compounding, pharmaceutical, medical device, semiconductor, aerospace, and other companies manufacturing and operating in controlled environments.

PCS specializes in cleanroom garment processing services for aseptic, particulate & ESD controlled environments.

### Product Overview

- Prudential Cleanroom has a product selection that includes high quality sterile and non-sterile apparel for cleanrooms.
- Our products utilize non-linting, high density fabrics that are resistant to liquids and bacteria.
- Each cleanroom uniform is designed to reduce the spread of contaminants based on the customer's work environment.

Prudential Cleanroom Services offers cleanroom solutions and services to facilities involved in the compounding and preparation of medications and sterile infusions. This ensures that the medications are manufactured under controlled conditions to minimize the risk of contamination and maintain patient safety. Utilizing PCS's services with high quality sterile gowning and ancillary items required for cleanroom gowning and maintenance helps support a business's cleanroom standards.

## The Compliance Team, Inc.

### Company Background

The Compliance Team delivers innovative, nationally recognized Exemplary Provider® accreditation and certification programs to pharmacies, rural health clinics, physician practices, infusion practices (ambulatory and home), immediate care clinics, DMEs, and health departments.

### Product & Services Overview

We have three infusion programs: CMS-approved HIT, physician practice, and ambulatory infusion suite. All programs focus on continuous quality improvement for patients and staff and include:

- A one-on-one, expert accreditation phone advisor.
- Plain-language, easy-to-understand, operations-based standards.
- Access to The Compliance Team's provider-only portal, complete with tools, templates, checklists, standards, and webinars.
- Our proprietary patient satisfaction survey portal.

### Exemplary Provider® Status sets you apart

Successful completion of one or more of our programs earns you Exemplary Provider® status, assuring patients, caregivers, physicians, other healthcare clinicians, payers, and employees that your clinic/pharmacy has met and/or exceeded the highest standards in healthcare delivery.

### Trella Health

Phone: 678-813-1590  
 Address: 3423 Piedmont Road NE, Ste. 305  
 Atlanta, GA 30305  
 Email: info@trellahealth.com  
 Website: trellahealth.com

Trella Health's unmatched market intelligence and purpose-built CRM allow infusion organizations to drive effective performance and growth with an integrated platform to identify the highest-potential referral targets, evaluate market opportunities, and monitor performance. Paired with CRM and EHR integrations, business development teams can better manage referral relationships to advance their organizations by improving their sales and marketing strategy. The most significant enhancement to our infusion database is coming winter of 2023 - increasing the claims volume in our solution by 2x.

### TrueCare Biomedix

Phone: 305-593-8444  
 Address: 6356 Manor Lane, Ste. 101  
 South Miami, FL 33143  
 Website: tcbiomedix.com

TrueCare Biomedix USA specializes in providing high-quality IV Administration sets, pharmacy compounding supplies, sterile cleanroom apparel and sterile low linting wipers. We are committed to providing specialty infusion products that are safe, reliable, and easy to use while staying cost-effective. That is why we leverage our collective, hands-on industry experience in everything we develop. We are dedicated to providing excellent infusion products that result in superior patient care. This includes outstanding customer service and on-time delivery performance. We consistently achieve this by combining trusted manufacturing facilities, national distributors with a strong regional presence, and a diversified product offering.

### TubeClear System (Actuated Medical)

Phone: 814-355-0003  
 Address: 320 Rolling Ridge Drive  
 Bellefonte, PA, 16823  
 Email: info@tubeclear.com  
 Website: tubeclear.com

The TubeClear System is a feeding tube clearing system that uses proprietary mechanical motion to clear partial and full clogs in feeding and decompression tubes (Tubes) while the Tube remains indwelling and at bedside. TubeClear was developed to assist healthcare practitioners with maintaining enteral medication and nutrition therapy. During delivery, medication and nutrition materials often build up on the inner walls of Tubes. Over time, this buildup narrows the inner diameter and causes the Tube to become sluggish and/or clog which impedes critical enteral therapy delivery. Using the TubeClear System regularly helps to keep enteral therapy on schedule and using TubeClear quickly on clogged Tubes restores patency and enteral therapy schedules.

### Universal Software Solutions

Phone: 810-653-5000  
 Address: 1334 South Irish Road  
 Davison, MI 48346
